

Ring Size Finder

Print this page and please carefully follow the instructions below to ensure a proper finger size measurement.

Confirm to Scale

1. When printing be sure you **do not** have "Shrink oversized pages to fit paper size" or "Expand small pages to paper size" selected in the Print dialog box.
2. Measure the bar on the left with a ruler to be sure you printed to actual size.

Tips to ensure a proper measurement:

Measure your finger in a warm temperature at the end of the day.

If you are considering a wide band, move up a half size from your measurement as it is tougher to get over the knuckle.

Method A

1. Find a piece of string (that doesn't stretch), or a strip of paper about 6 inches long and 1/4 inch wide.
2. Wrap it so it fits snugly around the intended finger.
3. Use a pen to mark the point on the string where it overlaps the end.
4. Compare the length of the string to the lines on this paper below to determine the finger size. If you are between sizes, order the half size between the two.

Method B

Find a ring that properly fits the correct finger (The ring finger is located between the middle finger and little finger). Place the ring over the circles below and find the closest match, making sure the inside of the ring lines up with the outside of the circle.
